

To activate your Polycom PVX software license, you will need:

- Internet access & Internet Explorer
- License key from the sleeve of the software CD (See Figure A)

Figure A

Register Your PVX License

- Log on to the **Polycom Resource Center**, <http://extranet.polycom.com>
- Login and click **enter**. If you do not have a PRC account, click on the **New User Account** link, then click on **Continue**.
- Once signed on to PRC, select **Product Activation** from the menu on the left side of the page.
- Fill in the License Key from the back of the CD sleeve in the License Number **and** Serial Number fields (see Figure B).
- Click on **Generate**. The activation key will appear next to **Key Code: Save this number**.

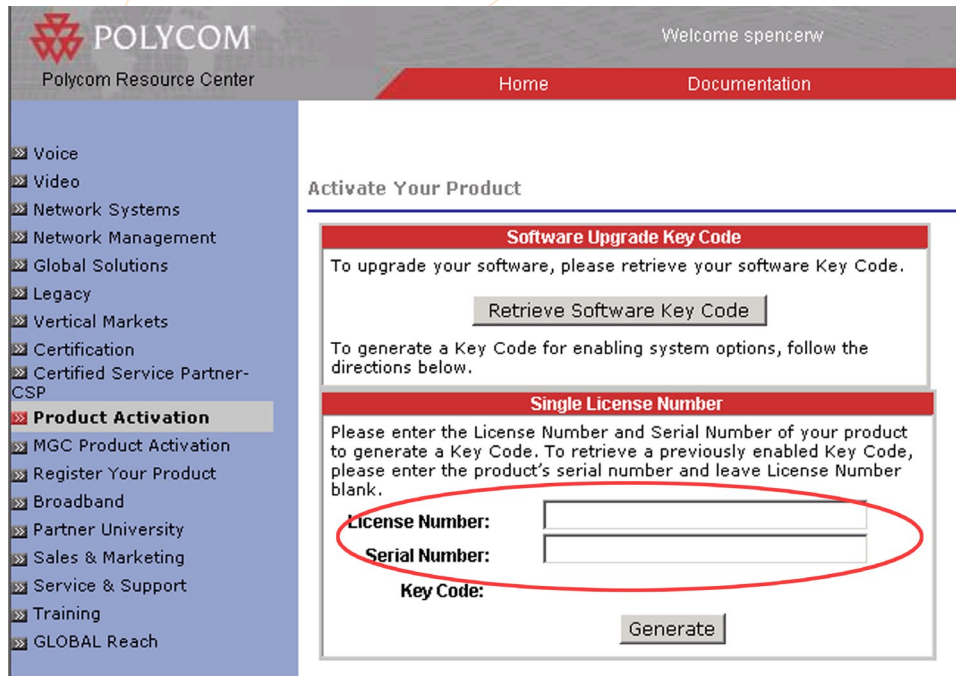

Figure B

Open PVX

- If you have not already installed the PVX software on your PC, do so now.
- Open the PVX program, using the new desktop shortcut, or through your Programs menu.
- Click on the **System Information** button in the upper left corner of the PVX window (see Figure C).

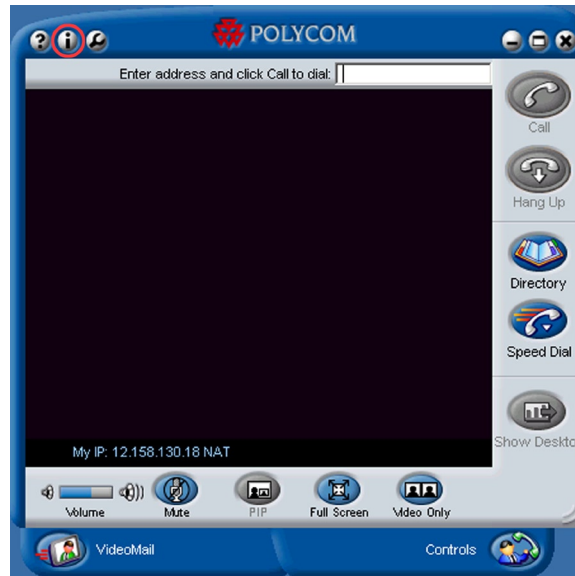

Figure C

- Select the **Activate** button
- Input the License Number from the CD cover and the Key Code generated above, then click on **Activate** (see Figure D).

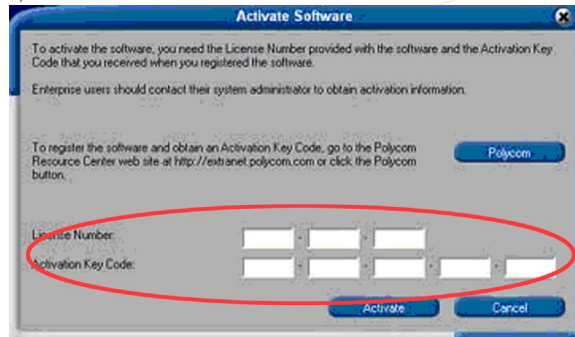

Figure D

Retrieving Previously Issued Licenses

To retrieve licenses previously registered to you, go to the Polycom Resource Center and click on License Number - Key Code History, located at the bottom of the Product Activation page. This will display all previous licenses issued to your login ID.

Additional Assistance

For additional assistance, please contact SKC's video support team at (800) 882-7779, Ext. 4, or e-mail video.support@skccom.com.
