

PARKLET INFO

Parklets are a great way to help downtowns and main street communities promote economic activity, and adapt to new COVID19 recommendations such as social distancing and utilizing outdoor spaces.

They help provide more usable space for retailers and restaurants, as well as providing more outdoor space for congregating and recreation. People can wait for to-go or curbside pickup orders, sit outdoors and eat their meals, drink coffee, or take a break between shopping stops.

Please see the below links for more information, FAQs, and examples of how municipalities have implemented parklet permits.
