0	32	10	Mariah McKay - S	Attendee	SIMBA would like to participate in a breakout group around how to leverage this crisis to raise awareness and take action around the need for fundamental reform in our economic system's structure to be more equitable and resilient. The degree of vulnerability and "disposability" of small independent businesses in our current economy is unjust and unacceptable. Banks are getting bailed out to the tune of trillions while our members are being offered "opportunities" for more debt. The pecking order is clear and needs to be upended. We are in Washington State and as we survive and recover we are committed to a bold reform agenda as well.	Chat
